Points of Contact for Oceanographic Institutes In Europe and Russia

by John P. Dugan, an oceanographer who served as Liaison Scientist for Physical Oceanography at the Office of Naval Research European Office. Dr. Dugan has since returned to Areta Associates. Earlier, he was at the Naval Research Laboratory, Washington, DC.

This report is a compilation of physical oceanographers and closely associated disciplines in Europe and Russia that have been in contact with the Office of Naval Research European Office (ONR Europe) in the last two years. It was assembled because there are no coherent or easily accessible lists of Contacts presently available, and it is produced in report form for use by others who have expressed an interest in it.

This report has two separate lists,

- Appendix A — for European contacts
- Appendix B — for contacts in Russia and the former Soviet Union (FSU).

The European list includes approximately 700 oceanographers and other scientists in closely related disciplines. A data file on disk is also available in MicroSoft® Windows™ Takenote® application software.

The list for oceanographers in the FSU, Appendix B, is organized alphabetically by the institute and then by the name of the scientist or administrator. It includes a short description of known interests or expertise of each entry. The interest has been determined either by direct discussion with the scientist or by the subject of a previous scientific publication. This database has been assembled during 1991-1993, but its accuracy will decrease rapidly over time because of the drastic changes caused by the limited financial resources presently available. Appendix B is available on disk in WordPerfect® format.

Requests for the disks can be forwarded to ONR Europe to LCDR David St.Pierre on Omnet: D.STPIERRE or e-mail: dstpierre@onreur.navy.mil.
